

Anjolaoluwa Lasekan

Software Engineer | Java Full-Stack Developer

anjolaoluwa.dev@gmail.com | 514.299.5381 | [LinkedIn](#) | [Github](#) | [Website](#)

SUMMARY

Software Engineer with 3+ years of experience building full-stack web applications, RESTful APIs, and production microservices across freelance, internship, and co-op settings. Proficient in Java, Spring Boot, React, and TypeScript, with a proven track record delivering scalable backend systems, automated testing pipelines achieving 90%+ code coverage, and CI/CD deployments. Strong foundation in OOP, SOLID principles, design patterns, SQL/NoSQL databases, and Agile/Scrum development. Master of Applied Computer Science graduate from Concordia University.

TECHNICAL SKILLS

- **Programming Languages:** Java 17, Python, JavaScript, TypeScript, C++, C#, HTML5/CSS3
- **Backend:** Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, Node.js, Express | RESTful APIs, Microservices, Flask, FastAPI, MVC Architecture, OAuth2/OIDC
- **Frontend:** React, TypeScript, Angular, Vue.js, HTML5 Canvas, Figma-to-code (95% fidelity), Vite, Tailwind CSS
- **Databases:** PostgreSQL, MySQL, MongoDB, Oracle, JPA/Hibernate, SQLAlchemy, Query Optimization, SQL
- **Testing & QA:** JUnit 5, Mockito, MockMvc, PyTest, Jest, Cypress, Selenium, TDD, Unit/Integration Testing, JaCoCo, 85%+ Code Coverage
- **Cloud & DevOps:** Azure (App Service, Static Web Apps, Azure SQL, Blob Storage, Entra ID, DevOps Pipelines), Docker, Jenkins, AWS (EC2, S3, Lambda), CI/CD, GitHub Actions, Firebase, Hugging Face Spaces
- **AI/ML:** TensorFlow, Keras, PyTorch, OpenCV, InsightFace, scikit-learn, NumPy, pandas
- **Practices:** Design Patterns (MVC, Factory, Singleton, Observer, Command, Strategy, Repository), Agile/Scrum, Code Reviews, SOLID Principles, SDLC
- **Tools:** Git, IntelliJ IDEA, PyCharm, VS Code, Maven, Postman, Power BI, Chrome Extension Development (Manifest V3)
- **Languages:** English (C2 - Native), French (A1 - Beginner)

PROFESSIONAL EXPERIENCE

Data Engineer Intern – Quality Improvement Team

Oct 2025 – Jan 2026

Clinical Partnerships Office (CPO), Ingram School of Nursing, McGill University

Montreal, Canada

- **Engineered 7-step Python ETL pipeline processing 21,179 emails across 8,128 conversation threads from multiple shared mailboxes**, achieving 99.9% thread grouping accuracy and 93.3% deduplication precision through automated testing with synthetic datasets
- Built 5 production microservices with RESTful API integrations (Microsoft Graph API, SharePoint API) for enterprise-scale automation, achieving 90%+ code coverage with comprehensive unit testing
- Developed 3 Power BI dashboards visualizing 15+ operational metrics via REST APIs, enabling data-driven decision-making across cross-functional teams
- Collaborated in Agile environment with cross-functional stakeholders to translate business requirements into scalable backend solutions, conducting code reviews and maintaining Git version control
- **Tech Stack:** *Python, Flask, PyTest, Power BI, Microsoft Graph API, SharePoint API, pandas, NumPy, scikit-learn, RESTful APIs, Git, Agile/Scrum*

Teaching Assistant – Software Engineering

Jan 2025 – May 2026

Concordia University

Montreal, Canada

- Reviewed and evaluated 100+ Java implementations weekly for COMP 6481 and COMP 249, assessing Spring Boot-style MVC architecture, JUnit 5 test suites, SOLID principles, and design patterns against industry standards
- Conducted structured code reviews for 70+ students, providing technical feedback on architecture decisions, testing coverage, and debugging approaches across object-oriented systems
- Identified recurring design and performance issues across student submissions, developing targeted guidance to address systematic gaps in algorithmic thinking and clean code practices
- **Tech Stack:** *Java, Spring Boot, JUnit 5, Mockito, OOP, Design Patterns, SOLID Principles, Git, IntelliJ IDEA*

Software Developer Intern - HNG Internship

Aug 2023 – Nov 2023

HNG Tech

Remote

- Built 5+ full-stack web applications with React and Firebase serving 500+ users, writing Jest unit tests achieving 85% code coverage; improved page load times by 15% and reduced UI bug reports by 20% through performance optimization
- Implemented responsive UI components from Figma designs with 95% design fidelity, improving cross-device consistency and integrating RESTful APIs for authentication and third-party services
- Collaborated in Agile sprints using Git for version control, conducting peer code reviews and participating in sprint planning with cross-functional teams

- Designed and integrated Firebase backend services including real-time database, authentication, and cloud functions to support full-stack application architecture serving 500+ users
- Tech Stack:** *React, TypeScript, Vue.js, Firebase, REST APIs, Figma, Git, Agile/Scrum*

Freelance Frontend Developer

Sept 2021 – Mar 2024

Self-Employed

Remote

- Designed and developed 10+ responsive web applications and client-facing products for small businesses and startups using React, JavaScript, TypeScript, HTML5, and CSS3
- Integrated RESTful APIs and third-party services including Stripe, Firebase, and Google Maps to deliver dynamic, production-ready functionality across e-commerce prototypes, admin dashboards, and landing pages
- Collaborated directly with clients to gather requirements, translate briefs into UI/UX wireframes, and deliver tailored solutions aligned with brand identity and business goals
- Optimized web performance, cross-browser compatibility, and accessibility (WCAG standards); delivered clean, maintainable code using Git with modern build tooling via Vite and Webpack
- Tech Stack:** *React, JavaScript, TypeScript, HTML5, CSS3, REST APIs, Firebase, Stripe, Git, Vite, Webpack, Responsive Design, Figma*

PROJECTS

JobTrackr — Full-Stack Job Application Tracker [\[link\]](#) [\[Github-repo\]](#)

2026

- Built a Chrome extension (Manifest V3) using content scripts and the chrome.identity API to scrape job postings from LinkedIn and Indeed and save them via OAuth-authenticated calls to a Spring Boot REST API
- Implemented multi-provider authentication (Microsoft Entra ID OAuth2, delegated Microsoft Graph API scopes) with JWT validation across three distinct client surfaces — web app, browser extension, and REST API — unified under one Azure AD identity model
- Engineered an email intelligence feature using Microsoft Graph API to automatically scan a user's inbox, classify application-status emails via keyword pattern matching, and update job records without manual input
- Deployed a full Azure stack (Static Web Apps, App Service, Azure SQL Database, Blob Storage) with CI/CD via Azure DevOps Pipelines running automated JUnit/Mockito tests and JaCoCo coverage reporting on every push
- Designed a React/TypeScript frontend with a drag-and-drop Kanban board (@dnd-kit), sortable/filterable table view, and live application-funnel statistics dashboard
- Tech Stack:** *Java 17, Spring Boot, Spring Security, React, TypeScript, Azure AD, Microsoft Graph API, Azure SQL, Azure Blob Storage, Chrome Extensions (Manifest V3), Azure DevOps CI/CD*

Production-Grade Face Recognition Application [\[Live App\]](#) [\[Github-repo\]](#)

2026

National Technical University of Ukraine, Kyiv, Ukraine

- Built production-ready face recognition web app deployed on Hugging Face Spaces**, serving 100+ concurrent users with real-time detection, video processing, and webcam integration
- Architected Flask REST API with 7 endpoints** for image upload, video analysis, smart auto-capture, and person management, achieving 99%+ recognition accuracy using ArcFace embeddings
- Implemented zero-retraining architecture** using embedding-based comparison instead of classification, enabling instant person addition in 2 seconds vs 2+ hours with traditional CNN approach
- Designed multi-user session management system** with isolated temporary additions, allowing concurrent usage without data conflicts across users
- Tech Stack:** *Python, Flask, Docker, REST APIs, InsightFace, OpenCV, NumPy, JavaScript, HTML5 Canvas, Gunicorn, Microservices, Cloud Deployment*

API Testing Framework [\[link\]](#)

2026

- Built a production-style REST API with Spring Boot 3.2 using a layered controller/service/repository architecture, with full unit and integration test coverage via Mockito and MockMvc
- Integrated JaCoCo for coverage reporting and configured a GitHub Actions CI/CD pipeline that builds, tests, and uploads coverage artifacts on every push to main
- Tech Stack:** *Java 17, Spring Boot, Spring MVC, Spring Data JPA, JUnit 5, Mockito, MockMvc, JaCoCo, MySQL, GitHub Actions, TDD, Maven*

EDUCATION

Master of Applied Computer Science Co-op

2024 – 2026

Concordia University, Montreal, QC · GPA 3.41 / 4.3 · Member, Institute for Co-operative Education

- Relevant Courses: Program and Problem Solving, Comparative Study of programming languages, Advanced Programming Practices, Human Computer Interface Design, Distributed System Design, Applied Artificial Intelligence, Algorithm Design Techniques, Big Data Analytics, Conversational Artificial Intelligence, Immersive Technologies.

Bachelor of Computer Engineering

2019 - 2023

National Technical University of Ukraine, Kyiv, Ukraine · GPA 95 / 100

- Relevant Courses: Computer Vision, Machine Learning, Deep Learning, Data Structures and Algorithms, Database Systems, Artificial Intelligence.
